

Escape-Chair® ST-B / ST-PLUS / CF

Evacuation ... in a sitting position

What`s an Escape-Chair®?

An Escape-Chair® is the solution to evacuate people to safety in a seated position down a flight of stairs. A simple procedure can make the Escape-Chair® fully functional within a few seconds.

How does an Escape-Chair® work?

The unique glide/brake system makes the braking of the Escape-Chair® possible on all different kinds of stairs, from wood to concrete. This braking system is optimized by the weight of the evacuee, in combination with the pressure of the operator pushing down on the handle in the direction of the stairs.

Advantages Escape-Chair®:

- Ideal for quick evacuation.
- Can be operated by a single person.
- Ready for use within seconds.
- Carrying people is no longer necessary.
- Speed of descent to be determined by the user (extra brake is unnecessary).
- Easily maneuvering into the evacuation flow.
- Forms minimal blockage on the stairs.
- Fits into your emergency plan.
- Safe closed gliding belt cassette.
- CE, TÜV & ISO 9001 certified.

Our advice:

Make sure you have an Escape-Chair® available in your organization so that you're prepared for any emergency.

"Failure to prepare for an emergency has its consequences."

ST-B Model

ST-PLUS Model
